

April 25, 2022

To All Students,

Re: How to spend “Golden Week” (reminder)

Please take the same infection control measures and actions as before in order to minimize the risk of infection during “Golden Week” (April 29th to May 5th). If you have tested positive for novel coronavirus infection or have been identified as a person in close contact, please fill out [the prescribed form for reporting novel coronavirus infection](#) on the University's website. We will confirm and respond to your report sequentially from Friday, May 6th after “Golden Week”.

Medical institutions may be closed during “Golden Week”, so please check the schedule of your family physician or nearby medical institutions during the holidays.

Infection Control Measures during “Golden Week”

- ✓ Do NOT go out when you are not feeling well.
- ✓ If you feel unwell, you should contact a holiday clinic or emergency hospital before going to see a doctor.
- ✓ When dealing with people who have high risk of serious illness, you should take thorough risk avoidance actions.
- ✓ Practice "silent eating".
- ✓ Have food and water on hand in case of emergency.
